## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 3-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daum USPN 6,704,600. Daum teaches a scanning system along with an external controller to inject a signal to change the settings in the heart including an av delay. Although, it is not taught as asynchronous pacing, it would have been obvious to use any type of pacing desired so as to achieve the necessary treatment to the patient including asynchronous. Applicant's claimed mechanisms for changing parameters and reprogramming the pacer are obvious, well known, elements. The use of magnets, switches as well as other known transmission systems are all well known programming mechanisms.

.Claims 1, 3-16, 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Richey et al USPN USPN 4,547,892 alone or in view of Daum USPN 6,704,600

Richey et al teach the invention including the use of a scanner that is gated using an ecg. An external pacemaker is provided to pace the heart to rid the heart of irregular heartbeats so that r-r timing and delay intervals may be calculated so as to acquire images in the desired phase of the heart contraction. While Richey et al does not explicitly state asynchronous pacing, it is clear that there is no type of feedback

system is applied and thus the pacing thus driven by the external device (asynchronous) and an obvious inclusion. It would have also been obvious to have made use of an internal pacemaker that is already within the body of a patient as is the case of Daum to control the pacing so as eliminate irregular heart events.

## Response to Arguments

Applicant's arguments with respect to claims 1, 3-16, 20-21 have been considered but are most in view of the new ground(s) of rejection.

Applicant's amendment in the previous response necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark W. Bockelman whose telephone number is (571) 272-4941. The examiner can normally be reached on Monday - Friday 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Layno can be reached on (571) 272 -4949. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
